

Beacon Academy

RJM Construction was selected by Beacon Academy, a K-8 charter school, to remodel a vacant parochial school.

The remodel included a 16,000 square-foot addition to accommodate the growing charter school's needs. Along with the remodel and addition, crews installed new roofing on two of the three building wings and performed site improvements. The facility holds 40 classrooms, a media center, gymnasium space and a performing arts center.

The team addressed mechanical, electrical and plumbing challenges early in the project and paid close attention to blending old with new to create a cohesive, functional space.

PROJECT SUMMARY

CLIENT	Beacon Academy
LOCATION	Minneapolis, MN
MARKET	Community
