

## Braemar Golf Dome

The City of Edina endured a fire that destroyed their indoor golf range. They hired RJM to build the new dome for an upgraded range.

During preconstruction, the team worked alongside the city to maximize their insurance reimbursement. An intricate fire suppression system was installed to protect the property.

When construction began, RJM cleared the site and placed a new fabric dome over the existing foundations.

A new support building was build adjacent to the dome. That space includes bathrooms, offices, and storage areas for the range operations.

## PROJECT SUMMARY

CLIENT	City of Edina
LOCATION	Edina, MN
MARKET	Community
PROJECT TYPE	Sports and Recreation
SQUARE FEET	50,737
ARCHITECT	Cunningham Group
