

## Entrust (formerly Datacard) Headquarters Remodel

LOCATION	Minneapolis, MN
MARKET SECTOR	Tenant Interior
SQUARE FEET	400,000
PROJECT TYPE	Office
ARCHITECT	RSP Architects

Entrust (formerly Datacard) purchased a vacant building to streamline its operations and relocate all of its employees to one central location.

RJM Construction renovated existing office space and converted manufacturing space into office use. The basement space was converted into labs, and the existing manufacturing area was remodeled to accommodate Entrust's manufacturing process. The existing cafeteria space was updated, and 3,500 sq. ft. was added to the building for additional cafeteria seating. The building's fitness center and locker rooms were also updated. Exterior upgrades included expanding the parking areas and cafeteria courtyard, enhancing landscaping around the entire building, and eliminating an unused entrance.
