

Hill-Murray School Plaza Renovation

LOCATION	Maplewood, MN
MARKET SECTOR	Community
SQUARE FEET	23,000
PROJECT TYPE	Education
ARCHITECT	292 Design Group

Hill-Murray hired RJM Construction to construct a new plaza entrance to compliment the school's updated athletic field and running track.

The 10,000-sq.-ft. plaza features a saw-cut concrete pathway with ADA access, a ticketing booth, and restroom building with a maintenance shed. Unique design elements include ornamental fencing, an ornamental donor wall and back-lit monument sign. To encourage guests to spend time on the plaza, benches were added along with a variety of trees, shrubs and perennials.

The RJM team combined vendor expertise with technology to work through unforeseen site conditions, resulting in delivering the project on schedule.
