

Hornets' Nest

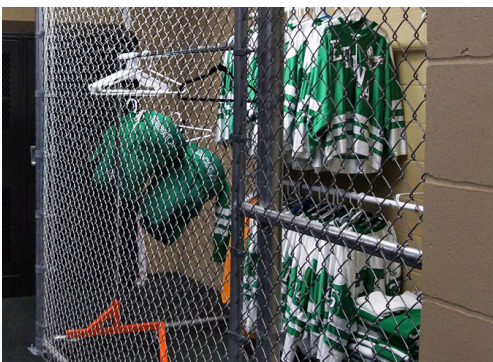

The City of Edina partnered with RJM Construction to build a two-level, 30,000-SF addition to the Braemar Ice Arena.

The lower level of the building houses elite locker rooms for the Edina Hockey Association. Alongside of those locker rooms are the coaching offices, training equipment, and study rooms.

The upper level of the addition includes a retail sporting goods store where community members can purchase hockey gear and Edina branded items.

The RJM project team had to create an accelerated schedule for this project. It was condensed to five months to meet the popular hockey season demands.

The very tight scheduled pushed the team to have strong communication. Orders were also placed ahead of time from the project start date to ensure timely arrival.

PROJECT SUMMARY

CLIENT	City of Edina
LOCATION	Edina, MN
MARKET	Community
PROJECT TYPE	Sports and Recreation
SQUARE FEET	30,840
ARCHITECT	Sperides Reiners Architects
