

## Methodist Hospital Cafeteria Modernization

LOCATION	St. Louis Park, MN
MARKET SECTOR	Healthcare
SQUARE FEET	17,636
PROJECT TYPE	Hospital
ARCHITECT	BWBR

Park Nicollet Health Services hired RJM Construction to remodel the existing cafeteria at Methodist Hospital.

New modern finishes were added to the hospital's busy dining area to help increase the ease of use for patients and staff and to create a more inviting, updated ambiance. The main hospital corridor was also reconfigured for more accessibility.

The team's biggest project challenge was coordinating the fire door location in a corridor that was full of medical, electrical, and plumbing equipment. The issue was resolved by holding additional coordination meetings and by utilizing our quality assurance and quality control department.
