

## Medina Public Works and Police Department

LOCATION	Medina, MN
MARKET SECTOR	Community
SQUARE FEET	69,000
PROJECT TYPE	Public Works
ARCHITECT	292 Design Group

The City of Medina recognized their existing public works facility, city hall and police station were not adequate to meet the growing needs of their city.

RJM Construction was hired as the construction manager to oversee re-purposing an existing warehouse for the public works department, and renovating the adjoining office area into a state-of-the-art police department. RJM scheduled regular design coordination meetings with department representatives and city staff to meet the programming needs of all parties while maintaining the budget.
