

Spectrum High School 7th & 8th Grade Center

Spectrum High School selected RJM to expand its campus by converting an office/warehouse building into a middle school.

The 36,000-sq. ft. facility serves 7th and 8th-grade students and consists of classrooms, an administration area, and a cafeteria. The project also included a building addition to accommodate a gymnasium for the growing charter school.

Closely collaborating with the project team and vendors for just-in-time delivery and installation allowed the compressed schedule to be completed in time for the start of the school year.

PROJECT SUMMARY

CLIENT	Spectrum High School
LOCATION	Elk River, MN
MARKET	Community
PROJECT TYPE	Education
SQUARE FEET	36,000
ARCHITECT	Rivera Architects
