

## Summit Orthopedics - Bielenberg Sports Center

LOCATION	Minneapolis, MN
MARKET SECTOR	Healthcare
SQUARE FEET	14,037
PROJECT TYPE	Specialty Care
ARCHITECT	Pope Architects

Summit Orthopedics hired RJM Construction to build their clinic and wellness center located within the Bielenberg Sports Center in Woodbury, MN.

The dense build out included a second floor addition and underground mechanical, electrical and plumbing connections to the facility's existing geothermal system. Metal plank ceilings, reclaimed wood and tile floors and walls were installed, creating a high-end contemporary space. The project team worked diligently to carefully plan and sequence the work, making it a successful project for all parties involved.
