

Park Nicollet Health Services Lakeville Clinic

LOCATION	Lakeville, MN
MARKET SECTOR	Healthcare
SQUARE FEET	28,420
PROJECT TYPE	Medical Office Building
ARCHITECT	292 Design Group

Park Nicollet Health Services selected RJM Construction to build a two-story build-out for their new clinic in Lakeville.

In addition to expanded size the clinic added new services in urgent care, OB-GYN, optical and eye care to serve more than 10,000 new patients. With the anticipation of growth in the future, the clinic has prepared for a larger expansion.

Ground water was unusually high due to record amounts of rain in the spring. This led to a very wet and clay-based site, causing a delayed schedule. RJM worked with the trades to push through the muck, stabilize the parking lot, and make up for lost time. As a result the project was delivered successfully, and on time.
