

Twin Cities Orthopedics Plymouth

Plymouth, MN

Twin Cities Orthopedics enlisted the expertise of long-term project partners RJM Construction and SRa to undertake the construction of a new medical office building in Plymouth, Minn. Having established a strong presence in the Plymouth community for over a decade, TCO serves thousands annually and aims to sustain its positive impact on the community through world-class orthopedic care.

Over the past ten years, Plymouth witnessed substantial growth, prompting TCO to respond by inaugurating a new facility spanning over 70,000 square feet. Alongside the Twin Cities Orthopedic Clinic,

the site features a 7,000-square-foot Training HAUS, TCO’s elite performance training facility. Like other TCO facilities, the Plymouth location incorporates urgent care, physical therapy, hand therapy, an advanced MRI imaging scanner, and EXCEL care suites.

After the grand opening, the existing Plymouth TCO closed its doors, consolidating operations into the new facility, which now serves as the Plymouth hub. In the future, an orthopedic surgery center is slated to open at this location in winter 2024.
